

# CASE STUDY

## Spend Analytics

**Client:**

A government organization in Queensland

**Business Problem:**

Lack of visibility of spend across the categories resulting in reduced or no ability to influence, reduce and optimize

**Solution:**

Built a spend analytics dashboard which provided near-real time visibility to the spend data

**Outcome:**

- Increased visibility on spend resulting in 2% spend reduction
- Gain insights for strategic sourcing
- Reduction in supplier risk
- Nurture effective supplier relationships
